

significant benefit in a prediction market's ability to overcome bureaucratic limits and be deployed anytime, anywhere to fill holes in corporate knowledge. Prediction markets also engage and educate employees.

6. ACKNOWLEDGEMENTS

A project this large could not have been possible without the help of many. Thanks go to our executive sponsors; colleagues in Europe and South America who ran markets in their regions; Human Resources who navigated approvals; those who helped with registration, surveys, and monitoring; business partners from eight organizations who developed questions, worked with us to analyze results, and incorporated them in their decision processes; and Christina LaComb of GE who kindly shared her company's experience and approach. Finally, the Ford Prediction Market could not have succeeded without the employee traders who enthusiastically embraced this new technology, making thousands of trades and comments in their desire to help Ford Motor Company answer important questions. Thanks to all involved!
